	Expendable Items							
1	Salt							
1	Pepper							

T 1/211 PATROL BOX INVENTORY

Patrol Quarter Master Responsibilities

1. Keep current inventory of patrol box contents.
2. Keep current inventory of patrol storage area contents (Propane stove, gas hose, Dutch oven, charcoal chimneys, tents, metal coal pans, 3 dish pans, dish washing soap, bleach, dish washing brush, paper towels, trash bags).
3. Verify that all patrol box equipment is clean one week before each campout and take action to clean items that are not clean.
4. Inform the troop quarter master of any items missing from the patrol box at least two weeks before any campout.
5. Verify that all patrol box equipment is clean at the end of each campout and assign cleaning responsibilities for items that cannot be properly cleaned at the campout to a scout who will return the item properly cleaned at the next troop meeting.
6. At the end of each campout, give any extra patrol box equipment to the troop quartermaster so that patrol boxes that are missing equipment can get their missing equipment back.
7. At the end of each campout, make sure that equipment is properly packed in the patrol box before putting it in the trailer. In particular, make sure that non-stick skillets have layers of paper towels or pot holders or other soft items between them and items that may scratch them.
8. During each campout, check knives for sharpness and sharpen as needed.
9. Make sure that the patrol box is cleaned before putting it in the trailer.
10. Instruct other patrol members on the proper use of patrol box equipment.
11. Attend the troop and patrol quarter master meetings.
12. If possible, attend all campouts where the patrol box will be used. If not, make sure that a designate is named, and provide the name to the quarter master and patrol leader.
13. Check out troop common equipment from the troop quarter master at the beginning of each campout and make sure this equipment is returned in good working order at the end of each campout.
14. Oversee setting up and taking down the patrol box at each campout. Normally, the patrol box should be packed and returned to the trailer Saturday evening before lights out.
15. With assistance of the patrol leader, assign wet tents to individual Scouts to be taken home, cleaned, dried, and returned at the next troop meeting.
